PROFESSIONAL SUMMARY. MCA 2026 graduate from GGSIPU, New Delhi with a strong foundation in data analytics, statistical analysis, and business intelligence. IBM Data Analytics Professional Certificate holder with hands-on experience in Python, SQL, Excel, and Power BI for data cleaning, exploratory data analysis (EDA), and interactive dashboard design. Skilled at translating raw data into actionable, KPI-driven business insights to support data-informed decision-making.

TECHNICAL SKILLS

- **Programming & Querying:** Python, Pandas, NumPy, SQL, MySQL
- **BI & Visualization:** Power BI, DAX, Power Query, Excel (Advanced: Pivot Tables, Slicers, VLOOKUP/XLOOKUP), Plotly, KPI Dashboard Design
- **Data Handling:** Data Cleaning, Data Wrangling, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis
- **Tools & Platforms:** Jupyter Notebook, VS Code, Git, GitHub, MS Excel
- **Core Competencies:** Business Intelligence, Data Storytelling, Dashboard Design, Report Automation, Problem Solving

PROJECTS

Interactive Sales Analytics & Business Dashboard — Excel

- **Use:** Built an interactive, slicer-driven Excel dashboard analyzing multi-platform (Amazon, Ajio) sales performance, with all charts and visuals updating in real time on filter selection
- **Learning:** Data cleaning, data processing, and data visualization in Excel; building dynamic, user-input-responsive reports
- **Insight:** Identified the most profitable sales channels and key performance trends, enabling faster, data-backed business decisions

Advanced Sales Forecasting Dashboard — Power BI

- **Use:** Developed an end-to-end Power BI analytics project with custom DAX-based tables/columns and a sales forecasting model, exporting finalized reports as shareable PDFs
- **Learning:** Data cleaning in Power BI, DAX query writing, professional dashboard design, and forecasting model implementation
- **Insight:** Generated predictive, forward-looking sales insights by transforming raw data into actionable forecasts and visuals

End-to-End BI Reporting for Beginners — Power BI

- **Use:** Executed a complete Power BI report build from installation through data import to final dashboard, covering the full BI project workflow
- **Learning:** The full Power BI ecosystem: installation, data import, modeling, and step-by-step report/dashboard creation
- **Insight:** Built a strong foundational understanding of structuring a BI project from scratch

Exploratory Data Analysis (EDA) Project — Python

- **Use:** Conducted an end-to-end Python EDA project in Jupyter Notebook, from environment setup to summarizing dataset characteristics and identifying patterns
- **Learning:** Python programming and Jupyter Notebook workflows for structured exploratory data analysis
- **Insight:** Uncovered key trends and data distributions, demonstrating a clear, repeatable methodology for Python-driven data analysis

CERTIFICATIONS

Data Analytics Professional Certificate	IBM
Python with Data Analytics (Elite Certification)	NPTEL
AI Tools & Productivity	Be10X
Generative AI	Infosys
